

TANISH SHRIYAN

Udupi, Karnataka, India | tanishshriyan7@gmail.com | linkedin.com/in/tanishshriyan | tanishshriyan.vercel.app

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in cybersecurity and web development. Built two complete security tools — a real-time ransomware detector for Windows and a phishing URL identifier — applying Python, machine learning, and web technologies to solve practical problems. Strong foundation in security concepts, clean code practices, and building tools that work reliably.

SKILLS

Python, JavaScript, Java, HTML, CSS, Flask, Machine Learning, Git, GitHub, Linux, Jira, Data Structures & Algorithms

EXPERIENCE

Web Development Intern — InAmigos Foundation

July 2026

- Developed responsive web pages using HTML, CSS, and JavaScript
- Created website designs and UI prototypes using Figma
- Built and improved web interfaces while collaborating with the development team
- Strengthened front-end development and responsive design skills

PROJECTS

Real-Time Ransomware Detection System

Python, ML, HTML/CSS/JS, Windows

- Built a system that monitors file activity and running processes on Windows in real time to detect ransomware behavior before major damage occurs
- Applied machine learning to classify safe vs. malicious activity, enabling detection of new threats beyond known attack patterns
- Added a confirmation step for low-confidence cases, reducing the risk of blocking legitimate programs by mistake
- Built a web-based dashboard (HTML, CSS, JavaScript) for live alerts, flagged-process review, and response actions
- Validated detection accuracy and response time by testing against simulated ransomware attacks

Phishing URL Detection System

Python, ML, Flask, JavaScript

live-phishing-detection-76wr.onrender.com

- Built a phishing URL detection web app with separate modules for data preprocessing, feature extraction, model training, and prediction
- Processed a synthetic URL dataset and extracted URL-based features to train a model classifying safe vs. phishing links
- Tracked model performance using saved metrics to ensure consistent, measurable predictions
- Built a web dashboard (HTML, CSS, JavaScript) for URL submission and results; deployed live on Render

EDUCATION

B.Tech, Computer Science — NMAM Institute of Technology

Aug 2026 – 2029 (Ongoing)

Diploma, Computer Science Engineering — Indira Shiva Rao Polytechnic

July 2023 – June 2026

CGPA: 9.52 / 10.0

SSLC — St. Francis English Medium School, Mudarangadi

May 2023

Percentage: 87%

CERTIFICATIONS

- Cyber Security & Applied Ethical Hacking — Infosys Springboard, 2025
- Introduction to Artificial Intelligence — Simplilearn, 2026
- Introduction to Generative AI — Google Skills, 2026
- Claude Code in Action — Anthropic, 2026

ACHIEVEMENTS

- Ranked 904th in HackerRank Orchestrate 2026, a 24-hour AI agent building challenge

LANGUAGES

English, Hindi, Kannada, Tulu
